DETAILED ACTION

Allowable Subject Matter

Claims 7-12 have been deemed allowable as a result of Applicant's amendments received on 2/22/05.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Reasons for Allowance

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or reasonably suggest the use of a bandpass filter. By definition, a bandpass filter is a circuit that allows signals to go through it only if they are within a certain range of frequencies. Because it attenuates signals above and below this range, the addition of bandpass filter to the claims clarifies the ability to easily detect electrical heart signals and determine the origin of the detected signal.

The prior art made of record and not relied upon is considered pertinent to the applicant's disclosure. Sun (US 5,755,739) teaches the use of high pass filters for processing a sensed atrial electrogram in conjunction with a sensed ventricular electrogram, but fails to teach the incorporation of the bandpass filter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
